**SAFETY ENGINEERING-II (THEORY-III)**

*Instructions:—*(1) All questions are *compulsory*.

(2) Illustrate your answers with neat sketches wherever necessary.

(3) Figures to the right indicate *full* marks.

(4) Assume suitable data if necessary.

**Marks****20**

1. Select correct alternatives :—

(i) Feet getting injured by pneumatic hammer in moulding shops, preventive measures will be .....

- (a) Preventive maintenance of machine
- (b) Decide safe working condition
- (c) Provide safety shoes
- (d) Provide shock absorbing pads.

(ii) The method removing particulates from an air or gases steam without the use of filter is called .....

- (a) Cyclonic separation
- (b) Electronic precipitator
- (c) Particulate control
- (d) All of above.

(iii) Dyeing is the process of .....

- (a) Printing of fabrics
- (b) Color on fabric
- (c) Permanent color on fabric
- (d) Extra whiteness on fabric.

(iv) Machine related hazards in textile industry due to unguarding on nip point include .....

- (a) Spinning
- (b) Weaving
- (c) Pressure vessels
- (d) All of above.

(v) As per the factory Act and ACGIH prescribe maximum permissible exposure limit of total dust and cotton fibber dust in textile industry are .....

- (a) 1 mg/m<sup>3</sup> and 0.2 mg/m
- (b) 2 mg/m<sup>3</sup> and 0.3 mg/m
- (c) 3 mg/m<sup>3</sup> and 0.2 mg/m
- (d) 1 mg/m<sup>3</sup> and 0.3 mg/m.

(vi) The NDT needed for .....

- (a) Micro and small defects in cast
- (b) Defects in welding
- (c) Defects in machining
- (d) Defects in grinding.

(vii) Many times people are overcome by atmosphere in ships confined space .....

- (a) Toxic
- (b) Explosive
- (c) Noxious
- (d) All of above.

[ Turn over

- (viii) Depletion of ozone is caused by ..... .
- (a) CO<sub>2</sub> gases (b) CO gases  
(c) CFC gases (d) All of above.
- (ix) Standard size of containers used in cargo ships ..... .
- (a) 2.5M \* 2.5M \* 6M (b) 2M \* 2M \* 6M  
(c) 2M \* 2M \* 12M (d) 2.5M \* 2.5M \* 10M.
- (x) Cotton dust is mainly observed in ..... industry.
- (a) Green (b) Textile  
(c) Show (d) None of these.
2. Write in detail (any two) :— 16
- (a) Safety in loading and unloading of ships.  
(b) Type of machine guards.  
(c) Preventive maintenance.  
(d) Work permit system for an industry.
3. Write in detail (any two) :— 16
- (a) Importance of standard and codes of practices for plant and equipments.  
(b) Causes behind boiler explosion.  
(c) Noise control in factory.
4. Answer the following questions (any two) :— 16
- (a) What are safety equipments of mobile scaffold? What are the precautions to be taken while mobile scaffolds?  
(b) Write different fixed installations for fire prevention and protection in factory building?  
(c) As a safety officer, how you will design a good housekeeping program in construction industry?
5. Answer the following questions (any two) :— 16
- (a) List the measures to prevent boiler explosion.  
(b) Name the causes of bursting of a grinding wheel.  
(c) List the check list EOT crane.
6. Explain the following questions (any two) :— 16
- (a) Describe the type of hazards in an assembly shop.  
(b) Causes and effect of acid rain.  
(c) State the hazards and their control in sugar cane unloading, cane crushing and milling.
-
